CAREER OBJECTIVE

Computer Science Engineering graduate with hands-on experience in **Python, AWS Cloud, and Web Development**. Seeking an entry-level Software Engineering role at a product-driven company to build scalable cloud-native applications, contribute to agile teams, and grow into a full-stack developer with deep cloud expertise.

EDUCATION

Bachelor of Engineering (B.E) – Computer Science & Engineering (2022 – 2026)

Sri Ramanujar Engineering College, Anna University, Chennai

TECHNICAL SKILLS

1. **Languages & Frameworks:** Python, JavaScript, Java (Basics), HTML5, CSS3, SQL, MongoDB
2. **Cloud & DevOps:** AWS (EC2, S3, IAM, VPC, RDS, CloudWatch, CloudFront, SNS, SQS, KMS) Git,Github
3. **Tools & Libraries:** VS Code, Pandas, NumPy, Scikit-Learn, Matplotlib, NLP (Unicode text processing)

CERTIFICATIONS

1. **AWS Cloud Practitioner** – Prince Infotech, Chennai
2. **Python for Data Science** – Cognitive Class by IBM

INTERNSHIP

Backend Development Intern – Solidpro Engineering Support Pvt Ltd, Guindy, Chennai

(*July 2025 – August 2025*)

- Developed backend modules using **JavaScript** and performed database operations with **MongoDB** (NoSQL).
- Utilized **Git & GitHub** for version control and team collaboration in an agile environment.
- Supported application testing, debugging, and API integration for internal engineering tools.

PROJECTS

Titanic Survival Prediction – *Python, Pandas, Scikit-Learn, Matplotlib*

- Built a **Logistic Regression** ML model to predict passenger survival with ~80% accuracy.
- Performed data preprocessing, feature engineering, and model evaluation using Pandas & Scikit-Learn.
- Created data visualizations (bar charts, heatmaps) to analyze survival trends and key influencing factors.

Security Audit Dashboard – React.js, Node.js, Express.js, Mongodb atlas

- Developed a full-stack Security Audit Dashboard featuring log upload, search, filtering, sorting, and server- side pagination.
- Built RESTful APIs with Node.js and Express.js, integrated MongoDB Atlas for efficient data management.
- Deployed the application using Vercel, Render, Git, and GitHub.

Automatic Hybrid Tamil Index & Concordance Tool – python, *NLP, unicode text processing*

- Built a Tamil text analysis system that auto-generates word indexes and concordance reports from educational content.
- Implemented **Unicode text processing** and **Keyword-in-Context (KWIC)** analysis for Tamil language research.
- Demonstrated ability to work with **non-English NLP** and complex text parsing.

ACHIEVEMENTS & HIGHLIGHTS

- Built **3 end-to-end projects** combining web technologies, Data Science, and NLP — deployed on GitHub
- **AWS Certified** with practical knowledge of EC2, S3, IAM, VPC, and cloud monitoring tools.
- Successfully completed an **industry internship** in backend development with real-world database and version control exposure.

SOFT SKILLS

- Problem Solving • Team Collaboration • Communication • Adaptability • Self-Learning
- Agile Mindset
