Full Stack Python Developer | *Web Application Developer*

OBJECTIVE

To obtain a challenging position that enables me to utilize my technical skills in full stack development, contributing to innovative and efficient software solutions while enhancing my professional growth in a dynamic organization.

PROFESSIONAL SUMMARY

- Over **2.5 years of experience** in software development, including internship experience.
- Proficient in **Python, Django, Flask, AngularJS, HTML5, CSS3, Bootstrap, and JavaScript**.
- Experienced in working with **PostgreSQL** and **MySQL** for database design and optimization.
- Skilled in developing and maintaining **RESTful APIs** and handling backend logic with Flask/Django.
- Familiar with version control using **Git** and collaboration tools such as **GitHub** and **JIRA Basic**.
- Strong problem-solving and analytical skills with a focus on performance and maintainability.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3
Frameworks: Flask, Django, AngularJS, Bootstrap
Databases: PostgreSQL, MySQL
Version Control: Git, GitHub
Tools: VS Code, PyCharm, Postman, Docker
Operating Systems: Windows, Linux

PROFESSIONAL EXPERIENCE

Full Stack Python Developer

SSN College of Engineering, Kalavakkam, Chennai — *(Feb 2024 – Present)*

- Developed and optimized college ERP modules using **Python** and **Flask**, ensuring scalability and performance.
- Designed and implemented the **Placement and Admission modules**, improving automation and efficiency.
- Built and managed databases in **PostgreSQL** for structured and optimized data handling.
- Created responsive frontend interfaces using **AngularJS**, **HTML5**, **CSS3**, and **Bootstrap**.
- Developed and integrated **RESTful APIs** to enable seamless communication between frontend and backend systems.

- Collaborated with cross-functional teams to gather requirements and deliver quality solutions.
- Utilized **Git** for version control and ensured consistent deployment through **Docker**.

Intern – Python Developer

Startup Company (6-month Internship)

- Assisted in developing web-based applications using **Python**, **Flask**, and **HTML/CSS**.
- Supported integration of APIs and worked with **PostgreSQL** for backend management.
- Contributed to debugging, testing, and UI enhancements during application development.

ACADEMIC QUALIFICATION

Bachelor of Engineering (B.E.) – Civil Engineering
SBM College of Engineering & Technology, 2019

PROJECTS

1. AD Automation System

- Developed automation modules for administrative data management using Python and Flask.
- Integrated PostgreSQL for data handling and AngularJS for user interaction.

2. NPF Form Portal

- Built an online application system for institutional forms, modeled after the Merito sample portal.
- Implemented dynamic user interface with AngularJS and backend integration using Flask and PostgreSQL.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
